

welcome to  
our *office*

Calfrac leads the way in extracting oil and gas from some of the toughest reservoirs in the world. Our "office" includes completion and production sites around the globe. Our field workers are deploying game-changing hydraulic fracturing and completions solutions that help customers yield maximum production—even in the most challenging unconventional plays. And our service first philosophy ensures quality, reliability and integrity.

**Welcome to Calfrac. Welcome to the future of oil and gas production.**

welcome  
to our  
*new  
home*

Calfrac leads the way in extracting oil and gas from some of the toughest reservoirs in the world. We're proud to announce our new home in **San Antonio, Texas** which allows us to better serve customers. As a top-tier pressure pumping company, we pioneer innovative hydraulic fracturing and completions solutions that help our customers grow and yield maximum production—even in the most challenging unconventional plays.

# welcome to our *world*

Calfrac leads the way in extracting oil and gas from some of the toughest reservoirs in the world. As a pioneer in hydraulic fracturing, our visionary technologies aim to preserve natural resources. Our sustainable initiatives include green chemistry and water recycling processes. In our world, we focus on developing environmentally conscious solutions to ensure that both our customers, and our planet, always come first.
